

# EXCELLENCE IN ACTION

## FLINT'S SPOTLIGHT SERIES

# Environmental Services

Allison Fowler, Director of Environmental Services

FLINT's Environmental Services Division is a passionate team of professionals dedicated to delivering environmental solutions. Under the leadership of Angela Thompson, Vice President, Commercial & Environmental Services, and Allison Fowler, Director of Environmental Services, the division continues to set a high standard for responsible project delivery across Canada.

### A Legacy of Stewardship

Since its inception in 2017, the Environmental Services team has been committed to protecting the communities and ecosystems where we live and work. Specializing in end-of-life asset retirement, remediation, and reclamation, the team provides expert support throughout the project lifecycle. Their work ensures that every site is managed with care, compliance, and readiness for closure or redevelopment.

### Operational Excellence Across the Lifecycle

Our team delivers a focused suite of services that support responsible site development and closure. Core offerings include:

- **Abandonment & Decommissioning:** Safe and efficient retirement of infrastructure, including pipeline abandonment, facility dismantling, and hazardous materials management.
- **Environmental Assessments:** Comprehensive site evaluations to guide planning, risk management, and regulatory compliance.
- **Remediation & Reclamation:** Tailored strategies to restore land and ecosystems, including contaminated site remediation, soil and groundwater treatment, and full reclamation.

With offices in Calgary, Sherwood Park, Lloydminster, Grande Prairie, Burnaby, and Fort St. John, and remote team members across British Columbia, Alberta, Saskatchewan, and Ontario, we are positioned to respond quickly and cost-effectively, drawing on local knowledge and strong regional relationships.

### Allison Fowler: A Leader Rooted in Purpose

Allison brings a unique blend of technical and operational expertise, community spirit, and leadership to her role as Director. Raised in Kitimat, she was inspired by her parents' grassroots environmental work and their dedication to community advocacy. That early influence led her to pursue environmental engineering, where she discovered a career in consulting that combined her love of science and problem-solving with a strong sense of purpose. She began her career with hands-on fieldwork and technical reporting, moved into project management, and now leads FLINT's Environmental Services Division with a focus on operational excellence and strategic growth.

Beyond her professional achievements, Allison is a dedicated mentor and community advocate. From launching a free book program for children during the pandemic to mentoring young professionals through the University of Alberta's WiSE and WiSER programs, she exemplifies leadership that uplifts others.

### Looking Ahead

As demand for sustainable practices continues to grow, so does the impact of FLINT's Environmental Services Division. With a strong foundation, a clear vision, and a team driven by purpose, the future is bright.

Together, we are Helping Customers Bring Their Resources to Our World by delivering the environmental solutions that restore land, protect ecosystems, and leave a lasting legacy for the next generation.
